PLASTICS

**YOUR SPECIALIST**  
**IN**  
**EXTRUSION TECHNOLOGY**

## PRODUCTION OF EXTRUSION TOOLS

- Mono - and multilayer dieheads
- Nozzles for smooth and corrugated pipes
- Moldblocks
- Calibrations
- Corrugator spare parts
- Punching knives

## OUR USED MACHINES

### WE OFFER ...

- Sale of used pipe extrusion machinery
- Overhaul your old machines to increase efficiency and reduce maintenance costs
- Optimization of old systems to reduce energy costs
- Design and manufacture of new tools
- Solutions tailored to the customer and the products to be manufactured
- Machine commissioning and support with technical process issues
- Repair of molds and tools
- Repair and sale of extruder screws

TO OUR  
SHOP

## OUR NEW MACHINES

### ○ EXTRUDER

Energy-saving processing of thermoplastics, tailored to your needs. Modern motors and heating technology for efficient production.

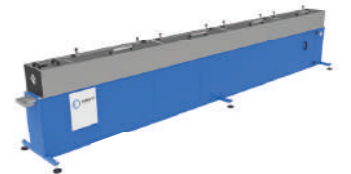

### ○ CORRUGATORS

Optimized and production-tested corrugators for the production of corrugated pipes from 4 mm - 60 mm diameter. Improved cooling and vacuum technology.

### ○ COOLING SPRAY BATH

Optimize your extrusion processes with our cooling spray baths and benefit from high quality and energy savings for more sustainability in your production.

### ○ CATERPILLAR HAUL-OFF

To complete a full extrusion line.

### ○ SELECTOR BELT

100 % inline length inspection of smooth and corrugated pipes using the latest camera technology.

### ○ COMPLETE SYSTEM CONTROL

Tailored to your requirements, we develop the right software for your control system.
